

**GOMA LACA SIN CERA
SUPERBLONDE**

(Shellac dewaxed platina)

Gama Interior

Código de producto: AGLS

**SPECIFICATIONS****RANGE**

| | |
|-----------------------------|---------------------|
| Colour | (1,25 - 2,00) |
| Acid No. | (65 - 80) |
| Ash | (max 0,20) |
| Insolubility in hot alcohol | (max 0,20) |
| Melting Range | (max 65 - 85 ° C) |
| Moisture | (max 2,00) |
| Saponification No. | (190 - 230) |
| Wax | (max 0,20) |
| Chlorine | (Nil) |
| Iodine Value | |
| Flow (ASTM method II) | (min 55 mm) |

Shellac has to be stored in a cool and dry place (at temperatures below 15 °C) in order to prevent the risk of blockage, which can cause weak solubility of the shellac. Generally, shellac keeps for a minimum of two years. During warm summer months, we advice our customers to choose cold storage.
